

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Outdoor Candle Torches

Raw Material

Slack -wax
Wick of porous wooden fibres
Metal cup

Additives

Glue

Packaging

Inner: Polyethylene (PE)
Outer: Corrugated board box

Field Of Application

The candles are meant to create light and a nice atmosphere. For outdoors use only. Do not move a burning garden light.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

Slack - wax is a by-product from the production of fuels from crude oil. When burning a candle mainly carbon dioxide and water are formed.

Packaging

Polyethylene is made from natural gas or mineral oil. The polymer consists simply of carbon and hydrogen. The corrugated board box is made of unbleached corrugated board.

Product Safety

- To handle the candles in a proper way follow the instructions on the candle pictogram.
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented or will implement the environmental management system ISO 14001.

Management Of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2018-06-21. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, Environmental Affairs.
