

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Cassettes for DF machines

Raw Material

Aluminium alloy EN 6082

Rubber

Packaging

Outer: Corrugated board box

Field Of Application

The cassettes are intended for the use in DuniForm-machines when sealing DuniForm-trays.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example, minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects**Product**

Aluminium is a medium strength alloy with excellent corrosion resistance. Rubber is a combination of polymers of isoprene units and other natural substances and impurities

Packaging

The corrugated board box is made from wood, which is a renewable resource.

Product Safety

Duni manufacturing units are certified according to the international quality system ISO 9001.

They have also implemented implement the environmental management system ISO 14001.

Management Of Used Products

Energy Recovery

All the packaging materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Please make sure the cassette is managed in the right way after use. Check with the local recycling company for most suitable waste handling.

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2021-05-25. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, CSR and Quality Department.
