

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET**Product**

Hot Plate

Raw Material

82 Paraffin Waxes, Aluminium alloy, stainless steel, bullet Powder lacquer.

Packaging

Inner: Paper

Outer: Corrugated board box

Field Of Application

The products are intended for keep food hot when transported in different transport solutions.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspect**Packaging**

Paper is made out of tree, which is a renewable resource. The paper is unbleached.

The corrugated board box is made from wood, which is a renewable resource.

Product Safety

The product/raw materials fulfill the following:

- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

Management of Used Products**Energy Recovery**

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document 2021-06-21. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, Environmental Affairs.
