

## Environmental and product data sheet

### **Product**

Coasters

### **Product composition**

Dyed tissue made out of 100% virgin pulp.

### **Packaging**

Sleeve: PE or PP Foil, paper, corrugated board

Outer: corrugated board

### **Intended Use**

Using a coaster made of tissue paper is a simple, disposable option to protect surfaces from drink condensation or minor spills.

### **Packaging and Packaging Waste**

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

### **Environmental Aspects**

#### ***Product***

The tissue used for the Coaster is manufactured from Totally Chlorine Free pulp (TCF), or/and Elementary Chlorine Free pulp (ECF), i.e. bleaching chemicals used are oxygen, hydrogen peroxide, chlorine and ozone. The pulp is white or dyed.

PFAS (per- and polyfluoroalkyl substances) are not being used in any step of the manufacturing of the products covered by this datasheet.

The product is FSC certified according to "Mixed Sources" certification number DNV-COC-000148.

#### ***Packaging***

Polyethylene or polypropylene are used for packaging purposes and made from fossil sources. The corrugated board box is unbleached and to a large extent made of recycled fibers.

### **Product Compliance**

The tissue used for the coaster fulfil the following:

- Regulation (EC) No. 1935/2004 of the European Parliament and of the Council of 27th October 2004 concerning materials and articles intended to come into contact with food.
- BfR-Recommendations on Food Contact Materials, XXXVI. Paper and board for food contact / BfR = Federal Institute for Risk Assessment
- Coloured and printed products are tested according EN 646 (Determination of colourfastness of dyed paper and board) and has been found to have good fastness.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC Consumer Products.

### **Product End of Life**

Collection, sorting and material recovery are all part of the recycling process. Recycling is dependent on local waste handling infrastructure. Ease and recyclability of a product depends on the type of material, composition and sometimes color.

The packaging material can be recycled as paper and plastic respectively. Used product should be handled according to local regulations. Some areas may allow products to be disposed with food waste, but to be sure, please check with local waste handling company.

### **Validity**

This is issued 2024-08-26. It is revised when there is a change in the manufacturing process, in the product or in legislation.
