

## ENVIRONMENTAL AND PRODUCT INFORMATION SHEET

### **Product**

APET lid (transparent)

### **Material**

Amorphous Polyethylene terephthalate (APET)

### **Packaging**

Inner: Polyethylene (PE)

Outer: Corrugated board

### **Field of Application**

The lids can be used safely with all types of foodstuffs, serving cold and hot. The articles can be used for storage and temperatures up to 2 hours at 70°C.

The lids are not suitable to use in a microwave oven.

### **EC Directive 94/62/EC on Packaging and Packaging Waste**

The packaging complies with all essential requirements as defined by 94/62/EC.

For example, minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

### **Environmental Aspects**

#### **Product**

PET is, like most plastic materials, produced by refining mineral oil or natural gas. The polyester consists of carbon, oxygen and hydrogen.

APET is made from virgin plastic.

#### **Packaging**

PE is manufactured from mineral oil or natural gas.

The corrugated board is unbleached and to a large extent made from recycled fibres.

### **Product Safety**

The products fulfill the following:

- EU Regulation 1935/2004/EC
- EU Regulation 2023/2006/EC
- EU Regulation 10/2011/EC with amendments.  
Migration tests on the article material performed by an independent institute showed that under appropriate test conditions, overall and specific (when relevant) migration falls considerably below the limit given by regulation 10/2011. (For further details, see *Declaration of Compliance*).
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC for hygiene.

### ***Management of Used Products***

#### ***Energy Recovery***

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

#### ***Recycling***

Recycling of the plastic and the corrugated board is possible for producing new products. However, recycling depends on collection, sorting and general material acceptance. Always consult with a local waste handler for recycling recommendations.

#### ***Validity***

This is a copy of a document issued 2022-01-17. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni Group
