

ENVIRONMENTAL AND PRODUCT INFORMATION SHEET

Product

Paper Tablecover and Banquet Reels

Raw Material

MG paper (MG stands for Machine Glazed)

Additives

Dye, ink

Packaging

Inner: Plastic film of polyethylene (PE) or polypropylene (PP)

Outer: Corrugated board box

Field Of Application

The product is intended for the use of enhancing the tabletop environment.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example, minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects**Product**

The material contains to 100% recycled / secondary fibres.

Printing is done with water-based printing inks.

Product is FSC certified according to "Mixed Sources" certification number DNV-COC-000148.

Packaging

Polyethylene and polypropylene are used for packaging purposes.

The corrugated board box is unbleached and to a large extent made of recycled fibres.

Product Safety

The product fulfils the following:

- Regulation (EC) No. 1935/2004 of the European Parliament and of the Council of 27th October 2004 concerning materials and articles intended to come into contact with food.
- BfR-Recommendations on Food Contact Materials, XXXVI. Paper and board for food contact / BfR = Federal Institute for Risk Assessment
- Coloured products are tested according EN 646 (Determination of colourfastness of dyed paper and board) and has been found to have good fastness.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC for hygiene.

End of Life**Recycling**

Collection, sorting and material recovery are all part of the recycling process.

Recycling of the plastic and the corrugated board is possible for producing new products. However, recycling is dependent on local waste handling infrastructure. Make sure to check with the local recycling company.

Energy Recovery

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

Validity

This is issued 2023-07-11. It is revised when there is a change in the manufacturing process, in the product or in legislation.
