

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

PET/Cardboard Tray

Raw Material

Paper board
PET laminated

Packaging

Inner: Polyethylene PE
Outer: Corrugated board box

Field Of Application

The trays can be used for packaging dry, aqueous, acidic, low alcoholic and fatty foodstuffs and suitable for use under the following conditions, temperatures and times:

- Freezer/fridge
- Room temperature (up to 40°C for more than 24 hours)

With aqueous, acidic and fatty foodstuffs also:

- Hot-fill (heating up to 70°C for up to 2 h or up to 100°C for 15 minutes)
- Microwave oven*
- Conventional oven (up to 220°C for 1 hour)

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

Paper is made from wood, which is a renewable resource. The pulp is unbleached.

PET is a polymer produced from refining of mineral oil or natural gas. The polymers consist simply of carbon and hydrogen

Packaging

Polyethylene is a polymer produced from refining of mineral oil or natural gas. The polymer consists simply of carbon and hydrogen.

The corrugated board box is made from wood, which is a renewable resource.

Product Safety

The products / raw material fulfil the following:

- EU Regulation 1935/2004/EC, Material and products intended for contact with foodstuff.
- EU Regulation 2023/2006/EC, Good Manufacturing Practice.
- EU Regulation 10/2011/EC with amendments, Material and products of plastic produced for contact with foodstuff.
Migration tests on the article material performed by an independent institute showed that under appropriate test conditions, overall and specific (when relevant) migration falls considerably below the limit given by regulation 10/2011. For further details, see Declaration of Compliance.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 14001 as well as to BRC for hygiene.

Management of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2019-06-14. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB.
