

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Condiments Sugar

Raw Material

Sugar 5 g

Refined sugar (white sugar corresponding to standard quality for white sugar grade 1 as described by Directive (EC) No 2001/111 (related to certain sugars intended for human consumption).

Nutritional value (100g):

Caloric value: 400 kcal / 1700 kJ

Carbohydrates: 100 g - of which sugar 100 g

Packaging

Inner: Polyethylene

Outer: Corrugated board

Field Of Application

Sugar for beverages and food.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC. For example, minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Product Safety

The product (sugar) fulfils the following:

- Regulation (EC) No 178/2002 laying down the general principles and requirements of food law
- The sugar used are food grade and comply with European legislation Council directive 2001/111/EC relating to certain sugars intended for human consumption.
- The articles are manufactured following principles of BRC-food and BRC-IoP.

The material used fulfils the following:

- EU Regulation 1935/2004/EC, Material and products intended for contact with foodstuff.
- EU Regulation 2023/2006/EC, Good Manufacturing Practice.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC for hygiene.

Storage advice

Recommended storage conditions:

Ambient temperature (+/- 20°C)

Relative humidity ≤ 65 % (at 20°C)

Avoid temperature differences and contact with wet surfaces.

Under the above-mentioned conditions the sugar retains its specific properties and can be stored for virtually an unlimited time. According to Directive 2000/13/EC an indication of the date of minimum durability ('best before' / 'used by' date) is not required for solid sugar.

Management of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2019-09-30. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB.
