

ENVIRONMENTAL AND PRODUCT DATA SHEET

Product

Sheet paper

Raw Material

Unbleached Kraft paper coated with LDPE (Low Density Polyethylene)

Packaging

Outer: Corrugated Cardboard

Field Of Application

The paper sheets can be used safely for all types of food except for acidic foods at maximum +70°C.

They should not be used for microwave oven.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects**Product**

The paper is made from unbleached pulp consisting of 100% virgin fibres.

The LDPE plastic originates from fossil sources.

PFAS (per- and polyfluoroalkyl substances) are not being used in any step of the manufacturing of the paper sheet.

Packaging

The corrugated board is based on recycled fibres.

Product Safety

The product fulfils the following:

- EU Regulation 1935/2004/EC, Material and products intended for contact with foodstuff.
- EU Regulation 2023/2006/EC, Good Manufacturing Practice.
- BfR XXXVI for Paper and board for food contact.
- EU Regulation 10/2011/EC with amendments, Material and products of plastic produced for contact with foodstuff.
Migration tests on the article material performed by an independent institute showed that under appropriate test conditions, overall and specific (when relevant) migration falls considerably below the limit given by regulation 10/2011. For further details, see Declaration of Compliance.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC for hygiene.

Management of Used Products

Recycling

The product may be recycled with cardboard and paper materials. However, recycling depends on collection, sorting and general material acceptance. Always consult with a local waste handler for recycling recommendations.

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Validity

This is issued 2023-05-23. It is revised when there is a change in the manufacturing process, in the product or in legislation.
