

## ENVIRONMENTAL AND PRODUCT DATA SHEET

### **Product**

Fold bag and take-away paper bags (brown and white)

### **Material**

Paper, water-based glue, inks for label

### **Packaging**

Outer carton: Corrugated cardboard

### **Intended Use/Area of Use**

The bags are supposed to be used for transportation of take-away food solutions and dry and non-fatty food such as bakery products.

| <u>Size of bag</u> | <u>Max. carrying weight</u> |
|--------------------|-----------------------------|
| 180X110X265MM      | 3 kg                        |
| 240X170X290MM      | 3 kg                        |
| 320X210X340MM      | 5 kg                        |

### **Product Safety**

The product fulfils the following:

- EU Regulation 1935/2004/EC
- EU Regulation 2023/2006/EC
- BfR recommendation XXXVI, Paper and board for food contact.
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

### **Environmental Aspects**

#### Product

Paper is made from virgin fibres and biobased (made from renewable sources).

PFAS (per- and polyfluoroalkyl substances) are not being used in any step of the manufacturing of the bags.

#### Packaging

The corrugated board is unbleached and to a large extent made from recycled fibres.

#### Labelling

The bags are FSC certified according to "Mixed Sources" certification number DNV-COC-000148.

### **Packaging and Packaging Waste**

The packaging complies with all essential requirements as defined by Directive 94/62/EC on packaging and packaging waste. This means minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, recycling, material recovery, energy recovery or composting (more details under Management of Used Products).

***Product End-of-Life***

*Recycling*

The paper bag can be sorted with paper for recycling. Check with the local waste handling company for best information on how to handle the product after use as markets and countries handle recycling differently.

*Energy Recovery*

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

*Recycling*

The paper bags can be sorted with paper for recycling. Check with the local recycling company to get the most accurate information.

***Validity***

This is issued 2023-05-08. It is revised when there is a change in the manufacturing process, in the product or in legislation.
