# ENVIRONMENTAL AND PRODUCT DATA SHEET

#### **Product**

Uncoated cardboard boxes CLAM BOX

#### Material

Paperboard and glue

### **Packaging**

Inner: Polyethylene (PE)
Outer: Corrugated board box

# Field Of Application

The cardboard boxes can be used at maximum 90°C.

The boxes perform best with for dry food. The cardboard has no lamination or other barriers for fat or moist. Greasy food will lead to fat stains on the in- and outside.

The boxes are not suitable to be used in a microwave oven.

Different kinds of food can have an impact on the physical behaviour of the material. Duni's recommendation is for the customer to test their application for their needs.

# EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

# **Environmental Aspects**

### **Product**

The boxes are manufactured from virgin pulp, a renewable resource.

PFAS (per- and polyfluoroalkyl substances) are not being used in any step of the manufacturing of the products.

### **Packaging**

Polyethylene is a polymer produced from refining of mineral oil or natural gas. The polymer consists simply of carbon and hydrogen.

The corrugated board box is made from wood, which is a renewable resource.

# Labelling

The boxes are FSC certified.

# **Product Safety**

The products fulfil the following regulations and recommendations and have been tested accordingly:

- EU Regulation 1935/2004/EC on materials and articles intended to come into contact with food.
- EU Regulation 2023/2006/EC on good manufacturing practice for materials and articles intended to come into contact with food.
- BfR XXXVI (BfR Bundesinstitut für Risikobewertung).
- Duni manufacturing units are certified according to the international quality system ISO9001. They have also implemented the environmental management system ISO14001.

### **Management of Used Products**

### Recycling

The product may be recycled with cardboard and paper materials. However, recycling depends on collection, sorting and general material acceptance. Always consult with a local waste handler for recycling recommendations.

Recycling of the plastic and the corrugated board is possible for producing new products.

### **Energy Recovery**

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

### Validity

This is issued 2023-10-18. It is revised when there is a change in the manufacturing process, in the product or in legislation.
