

ENVIRONMENTAL AND PRODUCT INFORMATION SHEET

Product

Take-away paper bags (brown and white)

Material

Paper
Water-based glue

Packaging

Outer carton: Corrugated cardboard

Intended Use/Area of Use

The bags are supposed to be used for transportation of take-away food solutions.

Product Safety

- The paper used in the bags are tested in accordance with European Commission Resolution AP 2002 on paper and board materials for antimicrobial constituents, benzophenone and 4-methylbenzophenone, PCP and heavy metals.
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

Environmental Aspects

Product

The paper is made from renewable sources and contains only virgin fibres.

Packaging

The corrugated board is unbleached and to a large extent made from recycled fibres.

Labelling

The paper bags are FSC certified.

Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by Directive 94/62/EC on packaging and packaging waste. This means minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, recycling, material recovery, energy recovery or composting (more details under Management of Used Products).

Product End-of-Life

Recycling

The paper bags and cardboard packaging may be recycled with cardboard and paper materials. However, recycling depends on collection, sorting and general material acceptance. Always consult with a local waste handler for recycling recommendations.

Energy Recovery

All the materials are suited for energy recovery. Incineration of mixed waste for energy recovery is a good end-use of products. Paper may burn well with low emissions.

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

Validity

This is a copy of a document issued 2022-03-22. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation.
