

## DECLARATION OF COMPLIANCE

Description	Material	Article Number
Tray	CPET	205249

Duni declares that the article meets the requirements of:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP)
- EU Regulation 10/2011/EC with amendments (Plastic regulation)

### Overall migration (1)

According to the above-mentioned regulation EU Regulation 10/2011, the overall migration does not exceed 10 mg/dm<sup>2</sup> or 60 mg/kg.

### Specific migration (2)

This article contains monomers or additives subject to restrictions under the plastic regulation 10/2011 and its amendments. A specific migration test proves that these are within the limits. If more information regarding the monomers or additives are needed please contact Duni AB.

### Area of use

The articles can be used safely with all types of food under following conditions:

✓	Application	Specific conditions	
		Temperature (°C)	Period food contact
✓	Storage in freezer	-40 – 0	Very long (>> 10 days)
✓	Storage in fridge	0-10	Long (> 10 days) The food itself probably sets the limitation
✓	Storage at room temperature	Max 40	Long (> 10 days) The food itself probably sets the limitation
	Keeping warm applications*	-	-
✓	Hotfill & serve temp	< 220	Immediate use
✓	Microwave oven	< 220	Short (< 2 h)
✓	Cooking application	< 220	Short (< 2 h)

\*CPET is not optimal for warm keeping conditions due to the material getting very soft around its glass transition temperature at appr. 70 °C This has to do with the usage aspect and not product safety. This does not mean the tray will melt, but it will get soft and weak.

For further details, please read product information sheet.

### Test conditions

Migration tests on the article material performed by an independent institute showed that under the following test conditions, overall migration (see 1.) falls considerably below the limit given by regulation 10/2011.

#### *Overall migration*

<i>3% Acetic acid</i>	<i>4h at 100°C</i>
<i>10% Ethanol</i>	<i>4h at 100°C</i>
<i>Olive Oil</i>	<i>4h at 100°C</i>

The ratio of food contact surface area to volume used is 6 dm<sup>2</sup>/kg

No substances of dual use are present in the product.

The product does not contain any functional barrier.

According to the document in our possession, Primary Aromatic Amines are below 10 ppb.

Please be advised that Duni Group does not add anything into the product.

This document of compliance is based on:

- Documentation from suppliers
- Global migration test
- Specific migration

This document was issued electronically and is therefore valid without signature.
