

# ENVIRONMENTAL AND PRODUCT DATA SHEET

## **Product**

Charging Station for two lamps

*Size of the charging station: 26x13 cm,  
Power Adopter Input- 100-240V AC, 50/60Hz  
Charging Station Input- 5V DC, Output: 2x2 W*

## **Material**

Plastic

## **Packaging**

Inner: Paper Carton box  
Outer: Corrugated board

## **Field of Application**

Charging station for two number cordless lamps, 5 hrs charging for 14 hrs function time.

- Inductive charging component
- Time efficient and safe charging solution
- Charge 2 lamps at once

## **EC Directive 94/62/EC on Packaging and Packaging Waste**

The packaging complies with all essential requirements as defined by 94/62/EC. For example, minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

## **Product Safety**

Testing and safety assessment of the product is performed independent institutes and shows the product are fulfilling relevant legislation and standards. For further details, see Declaration of Conformity.

We declare that the above rechargeable cordless lamp with remote control conforms to:

- 2014/35/EU Low Voltage Directive, LVD
- 2014/30/EU Electromagnetic Directive, EMC
- 2011/65/EU-2015/863/EU RoHS directive with the amendment

Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented or will implement the environmental management system ISO 14001.

## **Eco-design requirements**

Commission regulation (EU) 2019/1782 laying down eco-design requirements for external power supplies pursuant to Directive 2009/125/EC.

***Management of used Products***

The product complies with:

- EU Directive 2012/19/EU Product Recoverable according to WEEE
- EU Directive 2006/66/EC on batteries and accumulators and waste batteries and accumulators

***Recycling***

Collection, sorting and material recovery are all part of the recycling process. Make sure to follow local guidelines for electronics and battery waste handling.

Recycling of the packaging material is possible for producing new products. As recycling is dependent on local waste handling infrastructure make sure to check with the local recycling company.

***Validity***

This is issued 2023-10-10. It is revised when there is a change in the manufacturing process, in the product or in legislation.
