

Product Information Sheet

Product

Duni Tissue 1- and 2-ply napkins made of recycled tissue

Product composition

Tissue paper (recycled)

Packaging

Inner: Polypropylene (PP)

Outer: Corrugated board box

Intended Use

The products are intended for enhancing the meal and serving environment.

Packaging and Packaging Waste

The product and its packaging comply with all essential requirements set out in Directive 94/62/EC on packaging and packaging waste, as well as the forthcoming Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40.

Product Safety

The products and raw material (incl. printing inks) fulfil the following:

- Regulation (EC) No. 1935/2004 on materials and articles intended to come into contact with food.
- EU Regulation 2023/2006/EC (GMP)
- BfR-Recommendations on Food Contact Materials, XXXVI. Paper and board for food contact / BfR = Federal Institute for Risk Assessment.
- Purity requirements of the French Information Note – Fiche MCDA N°4.
- Coloured and printed products are tested according to EN 646 (Determination of colourfastness of dyed paper and board) and has been found to have good fastness.
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC Consumer Products.

Environmental Aspects

The napkins are manufactured from recycled tissue paper. Printing is done with water based flexographic printing ink.

PFAS (per- and polyfluoroalkyl substances) are **not** intentionally being used in any step of the manufacturing of the products covered by this data sheet.

Polypropylene are used for packaging purposes, and the corrugated board box is unbleached and to a large extent made of recycled fibres.

Product End of Life

Collection, sorting and material recovery are all part of the recycling process. Recycling is dependent on local waste handling infrastructure. Ease and recyclability of a product depend on the type of material, composition and sometimes color.

The packaging material can be recycled as paper and plastic respectively. Used products should be handled according to local regulations. Some areas may allow products to be disposed with food waste, but to be sure, please check with local waste handling company.

Validity

This is issued 2026-03-11. It is revised when there is a change in the manufacturing process, in the product or in legislation.
