

Product Information Sheet

Product

Bamboo napkin dispenser

A practical dispenser designed for napkins and other tabletop essentials. Its compact design helps keep counters, bars and serving areas neat and organized. Multiple compartments can be arranged to accommodate napkins and selected accessories.

- Compact and space-efficient design
- Flexible dispenser with configurable compartments
- Suitable for napkins and portion-packed condiments such as sugar, salt and pepper sachets, as well as condiment bottles
- Made from bamboo
- Suitable for counters, bars and self-service areas

Material

Bamboo, glue, lacquer

Packaging

Inner: Polypropylene (PP)

Outer: Corrugated board box

Area of Use

The napkin dispenser is intended for indoor use. The compartments can be configured according to individual requirements.

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

The product's packaging complies with the applicable requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR). Compliance is supported by technical documentation and evidence maintained by the manufacturer. Certain PPWR implementing measures and harmonized standards are still under development; therefore, compliance is assessed based on the applicable provisions of the Regulation and available guidance at the time of declaration. For PPWR DoC, please see separate document.

Environmental Aspects

Product

The product is primarily made from bamboo, a renewable plant-based material.

Packaging

The inner packaging is made of polypropylene (PP). Polypropylene is manufactured from fossil-based raw materials. The corrugated board box is made largely from recycled fibres.

Product Safety

The product fulfils the following:

- GPSR (General Product Safety Regulation)
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

End of Life

Recycling

Collection, sorting and material recovery are all part of the recycling process. Recycling is dependent on local waste handling infrastructure.

Bamboo does not typically have an established material recycling stream. Please check with your local waste management provider for guidance on the appropriate disposal route.

Compostability

This product has not been assessed or certified as compostable. Disposal should follow local waste management guidelines.

Energy Recovery

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

Validity

This is issued 2026-08-19. It is revised when there is a change in the manufacturing process, in the product or in legislation.
