

Declaration of Compliance

Description	Material	Article Number
Vacuum bags	PE/EVOH MONO	228432

Duni declares that the article meets the requirements of:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP)
- EU Regulation 10/2011/EC with amendments (Plastic regulation)
- EU Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols
- Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) regarding the restriction of per- and polyfluoroalkyl substances (PFAS)

This plastic product has been manufactured only with monomers, other starting substances and additives that are authorized under Regulation (EC) 10/2011 and all amendments.

Area of use

The bags can be used safely with all types of food under following conditions:

- any long-term storage at room temperature or below (down to -25 °C)
- Warm keeping at
 - up to 2 hours at a temperature $\leq 100^{\circ}\text{C}$

Low temperatures recommendations

In frozen conditions, plastic generally becomes more brittle due to the low temperatures, which can affect its flexibility. If the film is used in frozen condition, be aware:

- The bag may become less flexible and may crack or tear more easily.
- Freezing can weaken the seal of the film over time. For food packaging, this could lead to freezer burn or moisture loss if the seal breaks or weakens.
- Handle frozen packages gently.

Overall migration

According to the above-mentioned regulations, the overall migration does not exceed 10 mg/dm² or 60 mg/kg.

Specific migration

The material contains substances that are subject to restrictions according to regulation 10/2011/EC. Specific migration test proves that these are within the limits. Detailed information regarding the SMLs are available upon request.

745eafc3-b930-4a85-a156-288862d3dde5_34310 PE EVOH MONO ENG.docx

Test conditions

Migration tests on the material of the article performed by an independent institute showed that under the following test conditions overall migration and specific migration fall below the respective limits given by regulation 10/2011.

Overall migration

<i>Simulant</i>	<i>Contact time</i>	<i>Temperature</i>	<i>Result (mg/dm³)</i>
<i>10 % Ethanol</i>	<i>2 hours + 10 days</i>	<i>90°C / 40°C</i>	<i>< 10</i>
<i>3% Acetic acid</i>	<i>2 hours + 10 days</i>	<i>90°C / 40°C</i>	<i>< 10</i>
<i>Vegetable oil</i>	<i>2 hours + 10 days</i>	<i>90°C / 40°C</i>	<i>< 10</i>

Ratio of food contact surface area to volume of component used to establish the compliance of material is 6 dm²/kg.

The bags comply with the general restrictions of Regulation (EC) No. 10/2011 Annex 2 regarding heavy metals and PAA content.

The plastic in this product may contain additives that are subject to a restriction in food as referred to in Article 11.3 of EU Regulation 10/2011.

Substance	E-number
Aluminium	E173
Calcium carbonate	E170
Citric acid	E330
Fatty acids, stearic acid	E570
Polyethyleneglycol	E1521
Polyoxyethylene sorbitan monolaurate; Polysorbate 20	E432
Silica/Silicone dioxide	E551
Sodium, potassium and calcium salts of fatty acids	E470a
Talc	E553b
Glycerol Esters of Wood Resins	E445
Aluminium silicate	E559

Recommended storage conditions: 15°C-25°C in a dry place, away from direct sunlight. Maximum storage time from point of unloading of goods to be 6 months, if stored as recommended.

Please be advised that Duni Group does not add anything to the product.
