

Product Information Sheet

Product

Ronda bowls are made from paperboard with a PE lining.

Material

Printed cardboard with PE-lamination

Packaging

Inner: Polyethylene (PE)

Outer: Corrugated board box

Area of Use

The bowls can be used for long-term storage of all kinds of foods except highly aqueous food due to risk of leakage, at room temperature or lower (provided the food remains safe to consume and maintains its desired quality). They are also suitable for hot-fill applications, allowing filling with food at 100°C.

Microwave use: The boxes are not recommended to be used in a microwave oven.

Freezing: The boxes can be used for frozen food. The boxes are also safe to use for storage in the freezer but be aware thawing may impact the appearance and stability of the cardboard.

Environmental Aspects**Product**

The bowls are made from virgin pulp and PE (polyethylene).

PFAS (per- and polyfluoroalkyl substances) are not intentionally being used in any step of the manufacturing of the boxes.

Product is FSC certified according to "Mixed Sources" certification license code FSC-C014985.

Packaging

PE foil, made from fossil sources, is used for packaging to protect the product. The corrugated board box is largely composed of recycled fiber.

Packaging and Packaging Waste

The product and its packaging comply with all essential requirements set out in Directive 94/62/EC on packaging and packaging waste, as well as the forthcoming Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40.

Product Safety

The product fulfils the following:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP - Good Manufacturing Practice)
- EU Regulation 10/2011/EC with amendments (Plastic regulation)
- EU Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols
- Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) regarding the restriction of per- and polyfluoroalkyl substances (PFAS)
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

End of Life

Recycling

The boxes may be sorted with paper for recycling. However, recycling depends on collection, sorting and general material acceptance. Always consult with a local waste handler for recycling recommendations.

Energy Recovery

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

Validity

This document is issued 2026-02-10. It is revised when there is a change in the manufacturing process, in the product or in legislation.
