

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Molletons

Raw Material

Polyvinylchloride (PVC)

Polyester (10%) and Glass fibre (10%)

Packaging

Inner: Polyethylene (PE)

Outer: Corrugated board box

Field Of Application

The product is intended to use as an underlay to table cloth.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

PVC is made of mineral oil and common salt. The polymer consists of carbon, hydrogen and chlorine.

Packaging

PE is made by refining of mineral oil or natural gas. The polymer consists simply of carbon

and hydrogen. The corrugated board box is made from wood, which is a renewable resource.

Product Safety

Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

Management Of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2021-06-15 . It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, Environmental Affairs.
