Description	Material	Article Number
<i>Aluminium foil</i>	<i>Aluminium Alloy 8006</i>	719400

Duni declares that the article meets the requirements of:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP)
- BS EN 602:2004 Aluminium and aluminium alloys. Wrought products. Chemical composition of semi-finished products for the fabrication of articles for use in contact with foodstuff.
- French decree 27th August 1987: Aluminium and alloys
- Warenwetregeling Verpakkingen en gebruiksartikelen. Hoofdstuk III

Field of Application

The aluminium foil can be used for direct contact with dry, moist and fatty foods. Contact between the aluminium foil and very acidic or very salty food should be avoided, since they have a detrimental effect on the aluminium.

The foil can be used up to 300 °C for an unlimited period. It can also be used for storing food at room temperature or colder (incl. freezer). Make sure the food cools down before storing under chilled conditions. The condensation that may occur can cause discoloration.

Avoid direct contact with electric parts and direct flames.

The aluminium products only to be used in microwave ovens if the microwave oven itself allows the use of it.

Please be advised that Duni AB does not add anything into the product.
