ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Toiletseat paper

Raw Material

Tissue paper

Packaaina

Inner: Low Density Polyethylene (LDPE polybags)

Outer: Cardboards

Field Of Application

The product is intended to be use as a hygiene product.

Position the flap towards the front of the toilet when the cover is set down. If the cover has been placed on the seat properly, it will be pulled down into the toilet once you flush.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

Tissue paper is made 100% out of virgin fibres. The product is manufactured from ECF (Elemental Chlorine Free) pulp.

Packaging

The Polyethylene is made by refining of mineral oil or natural gas. The polymer consists simply of carbon and hydrogen. Cardboard is to some extent made out of recycled paper.

Product Safety

Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

Management Of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recyclina

Recycling of plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2021-05-06. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, CSR and Quality Department.
